

Song-Pick

Player Guide

Hear the song. Pick the right tile. First to answer scores most.

What is Song-Pick?

Song-Pick is a real-time multiplayer music guessing game. The host plays a song clip through Spotify — your job is to pick the correct song title and artist from 12 tiles on your screen. The faster you answer correctly, the more points you score.

The game works on any phone, tablet, or computer — no app download needed. Players only need the room code.

Roles

☐ Host

- Needs a Spotify Premium account
- Creates the game, picks genres and decades
- Controls when each song plays
- Also plays along and earns points

☐ Players

- No Spotify needed — just a browser
- Join with the room code
- Listen and pick the correct tile

Host Setup

Step 1 — Create the game

- Open the Song-Pick website
- Enter your name and tap Create Game
- Log in with your Spotify account when prompted

☐ Only the host needs Spotify Premium. Players join for free.

Step 2 — Configure the lobby

- Pick one or more genres (Pop, Rock, Hip-Hop, R&B, Electronic, Latin, Disney, Movie Hits, Viral Hits, One Hit Wonders, or Israeli Hits)
- Select one or more decades (1960s through 2020s)
- Choose the number of rounds (4–10)

Step 3 — Share the room code

A 4-letter room code appears at the top of the screen (e.g. AB12). Share it with players — they open the same website and enter the code to join.

✓ Players can join even after the game has started — they'll jump in from the next song.

Step 4 — Start the game

- Once players have joined, tap Start Game
- Songs are loaded from Spotify — this takes a few seconds
- Make sure Spotify is open and playing on your device before tapping Play

How to Play — Each Round

1. The song plays

The host taps ► Play. The song starts on the host's Spotify. A 20-second countdown begins for everyone.

□ Host can choose to play from the start of the song or from the middle using the Start / Middle buttons.

2. Pick your tile

Twelve tiles appear on your screen — each shows a song title and artist name. Only one is correct. Tap the tile you think is right.

- You can change your pick as many times as you like during the 20 seconds
- Only your final choice when the timer hits zero counts
- The host's tiles show the correct answer highlighted — hosts can still pick to earn points

3. Timer ends — results revealed

When the 20 seconds are up, the server scores everyone's final pick simultaneously. The correct tile turns green, wrong picks turn red, and the scoreboard updates.

4. If nobody gets it right

The host sees two options:

- ▶ +10 seconds — the host plays the song again and everyone gets another chance
- □ Reveal — skip straight to the answer

Scoring

Points are awarded based on who submitted the correct answer. Since everyone submits at the end of the timer, ties are broken randomly.

Position	Points
1st to answer	10 pts
2nd to answer	8 pts
3rd to answer	6 pts
4th to answer	4 pts
5th to answer	2 pts
6th and beyond	1 pt

✓ You don't have to be first — even a correct answer in 6th place earns 1 point. Always pick something!

Tips for Players

- Listen for the artist's voice first — that's often the fastest clue
- Scan all 12 tiles before picking — the correct one is always there
- Distractors include songs by the same artist, from the same year, or the same decade — read carefully
- You can change your pick as many times as you want before the timer ends
- If you're stuck, make a guess anyway — 1 point is better than 0

Tips for the Host

- Open Spotify on your device and play any song before the game starts — this activates the Spotify player
- Use the web player at open.spotify.com in the same browser for the most reliable playback
- The correct tile is highlighted green on your screen throughout the round
- Use "From middle" for long songs so players hear the main melody sooner
- The room code is shown throughout the game — latecomers can join at any time

Quick FAQ

Do I need Spotify to play?

Only the host needs Spotify Premium. All other players just need the room code and a browser.

Can I join mid-game?

Yes. Enter the room code at any time — you'll join from the next song with 0 points and play from there.

What if the song doesn't play?

The host needs an active Spotify device. Open Spotify on your phone or computer, play any song manually, then tap Play in Song-Pick.

Can the host play too?

Yes — the host sees the correct answer highlighted but can still pick any tile and earn points like everyone else.

What if the timer runs out and nobody got it?

The host can give everyone 10 more seconds (+10s) or reveal the answer immediately (Reveal). The host decides.

Good luck — and trust your ears! □
